

## KidSingers Essay

Throughout most of my life I have been known to be a very shy person. I did not like to communicate with others at first when I had come to Kidsinger's, I remember keeping mostly to myself for the first couple of weeks. Later on the directors began to introduce us to what we might be learning at Kidsingers, like being more open and expressing ourselves, I began to communicate with others more frequently and open up to others in a way that I did not do before. Kidsingers also showed a new way to express myself, in song, the music gave me a different path to how I could express myself when singing in the group, also giving me a different kind of happiness when doing so. We are also taught to dream big, work hard and achieve our goals. I want to do great things in my life and help others like the way people have helped me. Although I am not sure what I want to do with my life but I have an idea in the direction I want to go in, the field of medicine. Medicine has done so much for the people in my family, I want to also be a part of that and make a difference in someone else's life and in mine. Overall I want to pursue a career to help support my family, they say that I shouldn't worry about them and their problems and that I should worry about myself and what I can do for my education. I want to be able to give back to them which will not compare or won't be enough as to how much they have given to me throughout my life. Earning a degree will show me and my family how long of a way we have come and grown together, also to how I can be able to lift all the pressure off of my parents' shoulders and support them in a way that can benefit us in the long run by giving them something that they have given to me.
