

## Kidsinger Essay

Being a student from Middle College has really shaped me into the person I am today. Taking both college and high school classes isn't easy. However, over the course of three years I am able to say I'm doing just fine. Through the years I have made many short terms goals that I have been able to achieve and have many long terms goals waiting to be accomplished. Like most people, I wish to graduate from high school as well as attending a four year university. My goal is to graduate from a university with a double major in Business: Management and Marketing along with Mathematics and a minor in Fashion. I dream of having my own business in clothing and opening up a store. I aspire to be a strong successful independent woman.

I have been in Kidsingers for four years now. Throughout that time I have made many friends and have been able to outgrow the timidness that I had. Looking into the business major I have come to the conclusion that I will be needing to talk to many people and being in Kidsingers has helped not be as shy as I was. Kidingers has this great opportunity that allows kids from tenth to twelfth grade the ability of winning a scholarship. That scholarship money then goes to the college or university of our choice. This opportunity will bring me a step closer to my goal of going into a university.

First and foremost, a major reason for me to pursue a college degree would be to make my parents proud. My parents have done so much for my sister and I. All they have every asked for in return is for me to go the a university and have a substantial life with the education that I will receive. I believe that education is valued greatly. With great higher education there will be vast job opportunities involving you career. Overall, the pursuing of a college degree will have no negative effects, only a positive ones.
